(TRB Special Report 247)

Incident Type

- ☐ (Rock) Fall
- ☐ Topple
- ☐ Slide
- ☐ Spread
- ☐ Flow
- ☐ Compound
- ☐ Erosion
- ☐ Surficial Sloughing
- ☐ Scoured Toe
- ☐ Washout

Distribution

- ☐ Advancing
- ☐ Retrogressing
- ☐ Enlarging
- ☐ Widening
- ☐ Moving
- ☐ Confined

Highway Status

- ☐ Open
- ☐ Shoulder Closed
- ☐ Lane(s) Closed Lanes
- ☐ One-way Closed
- ☐ Two-way Closed

Pavement/Ground Status

- ☐ Pavement/Ground Cracks
 - feet, Length
 - inches, Horizontal Disp.
 - inches, Vertical Disp.
 - inches, Depth of Crack
- Settlement inches
- Bulge inches
- ☐ Indented by Rocks

Recommended Actions

- | Immediate Actions | Follow-up Actions |
|--------------------------|--|
| ☐ | ☐ Open Highway Traffic Lanes |
| ☐ | ☐ Open Highway Shoulder |
| ☐ | Close Highway ☐ One ☐ Both Directions |
| ☐ | Remove Landslide Debris from the Highway |
| ☐ | Place K-Rail or Fence |
| ☐ | Cover Slope with Plastic |
| ☐ | Divert Surface Water Runoff |
| ☐ | Remove Culvert Blockage |
| ☐ | Dewater with Pump, Trench, etc. |
| ☐ | ☐ Dewater with Horizontal Drains |
| ☐ | ☐ Construct Temporary Shoring |
| ☐ | ☐ Buttress Toe of Landslide |
| ☐ | ☐ Place Rock Slope Protection (ref. Manual) |
| ☐ | ☐ Routine Visual Monitor |
| ☐ | ☐ Reconstruct Slope to Original Condition |
| ☐ | ☐ Reconstruct Slope with Geosynthetics |
| ☐ | ☐ Repair Culvert/Drainage Pipe |
| ☐ | ☐ Install Erosion Control - by Dist. Landscape |
| ☐ | ☐ Survey the Site - by Dist. Survey |
| ☐ | ☐ Perform Geological Mapping |
| ☐ | ☐ Perform Subsurface Exploration |
| ☐ | ☐ Perform Detailed Design & Produce Plans |

Material

- ☐ Rock
- ☐ Bedding
- ☐ Joints
- ☐ Fractures

- ☐ Soil
- Clay
- Silt
- Sand
- Gravel

Est. %

-
-
-
-
-

Water Content

- ☐ Dry
- ☐ Moist
- ☐ Wet
- ☐ Flowing
- ☐ Seep
- ☐ Spring

Vegetation on Slope

Coverage %

- Trees
- Bushes/Shrubs
- Groundcover

Water/Drainage

- ☐ Clogged Inlet
- ☐ Compromised Drains
- ☐ Surface Runoff
- ☐ Torrent, Surge, Flood

Impacted May be Impacted

- ☐ ☐ Adjacent Utilities
- ☐ ☐ Adjacent Properties
- ☐ ☐ Adjacent Structures

Measurements

- Slope Height, ft (H)
- Original Slope, deg (α)
- Landslide Width, ft (W_d)
- Landslide Length (ft (L_d)
- Main Scarp Height, ft (H_s)
- Landslide Slope, deg (β)
- Length of Roadway Encroached, ft (L_r)
- Width of Roadway Encroached, ft (W_r)

Date	District	County	Route	Post Mile	Latitude	Longitude
------	----------	--------	-------	-----------	----------	-----------

Observations and Notes
Landslide Moving/Developing Rate, Pavement/Ground Cracks w/ Measurements; Slope and Bedding Orientations in relation to Roadway Alignment, Joints, Fractures; Site Access for further investigation and construction; Drainage; Erosion; Potential Causes of Incident; Constraints; Additional Notes on Checked Boxes; Site History (Interview Maintenance); Map Cracks - Location, Length, Horizontal & Vertical Displacements, Depth, & Direction. **Take Plenty of Photos and Measurements**

Sketch Draw Cross Section Facing Up-Station or Perpendicular to Movement; Draw Plan w/ Up-Station Identified
Map Cracks - Locations, Length, Width, Depth, & Direction
